

2010 Homeschool Science Fair

*Tuesday, January 19, 2010
Leonardtown Library*

You are invited to participate in our 9th annual Southern Maryland Homeschool Science Fair. You may register for either a science display or a scientific method experiment. The child participating with a scientific display should demonstrate knowledge of a science topic using visual aids. The child participating with a scientific method experiment should demonstrate knowledge of a topic using the results from conducting an experiment following the scientific method.

The Science Fair will be sponsored by, and held at, the Leonardtown Library. Students may arrive and begin setting up at 4:30pm, and judging will begin at approximately 5:15pm. Students should remain with their projects to be interviewed by the judges. Participation awards will be presented at approximately 6:45pm. All participants will receive comment books, judging sheets, and participation certificates. The Science Fair will remain open to the public until 7:30pm.

There will be an opportunity for our middle and high school level participants to compete in the St. Mary's County Science and Engineering Fair in February. Interested candidates will be interviewed by an additional pair of judges, and will be notified as to their status for qualification for the county's fair that evening. You must either live in St. Mary's County, or participate in some way in homeschooling in St. Mary's County, in order to be involved in the county's science fair.

We look forward to an exciting evening for our young scientists to share and learn. Please complete the following registration form and return it by mail or email to Cari Morrison by Wednesday, January 13, 2009.

The snowdate will be Thursday, January 21, 2009 at the same time and location.
