2018 Homeschool Science Fair
Thursday, January 18, 2018
Leonardtown Library

You are invited to participate in our 17th annual Southern Maryland Homeschool Science Fair. Your student (grades K-12) may register for either a science display or a scientific method experiment. The student participating with a scientific display should demonstrate knowledge of a science topic using visual aids. The student participating with a scientific method experiment should demonstrate knowledge of a topic using the results from conducting an experiment following the scientific method.

The Science Fair will be held in and sponsored by the Leonardtown Library. Students may arrive and begin setting up at 5:00pm, and judging will begin at approximately 5:45pm. Students should remain with their projects to be interviewed by the judges. Participation awards will be presented at approximately 7:00pm. All participants will receive comment books, judging sheets, and participation certificates. The Science Fair will remain open to the public until 7:30pm.

There will be an opportunity for our middle and high school level participants to progress to the St. Mary's County Science and Engineering Fair on January 26-27, 2018. Interested candidates will be interviewed by an additional pair of judges, and will be notified that evening as to his/her status for qualification for the county's science fair. You must either live in St. Mary's County, or participate in some way in homeschooling in St. Mary's County, in order to be involved in the county's fair. *(Additional registration materials are required, which must be submitted prior to the night of the homeschool fair. The students must also follow all guidelines set by the county's school system for their projects. You can visit their website for specific information, or contact Cari if you need further clarification.)*

We look forward to an exciting evening for our budding scientists to share and learn. Please complete the registration form and return it by mail or email to Cari Morrison **before** Sunday, January 14, 2018.

A snowdate is scheduled for Monday, January 22, 2018
 (Please make every effort to keep both dates available.)
